

CONSULTING **PRO**

Onsite Program Audits & Consultation Services

Level I: Sample Point Survey

Includes a plant walkdown to acquire complete documentation of your assets included in the oil analysis program along with verbal recommendations for proper sample point locations.

1-Day Audit (<100 assets)

Equipment Registration Roster

Level II: Oil Analysis Program Assessment

Includes a thorough onsite inspection of your lubrication and oil analysis program. The scope of the audit includes a review of the lubrication and oil analysis program, covering the sections listed below, each integral to a well-designed and executed program. After the physical audit takes place we will provide you with a detailed report outlining our findings and recommendations. This document will serve as a guideline to effective program start-up, as well as continuous improvement.

- Identify Equipment to be Sampled
- Recommend Sampling Point and Hardware
- Recommend Appropriate Test Slate & Frequency
- Audit Lubricant Storage & Handling Practices

1-Day Audit (<100 assets)

Detailed Assessment Report & Equipment Registration Roster

Level III: Lubrication Program Audit

Includes identification of areas for lubrication improvements and a project plan to transform how plant personnel think, act and feel about lubrication. Our auditor will perform a review, based on direct interviews and field observation, of the lubrication and oil analysis program, and deliver prioritized recommendations covering the sections listed below. The audit will include a program analysis identifying the current state of the program and a roadmap for overall improvements.

- Lubrication Program Management
- Lubrication Program Objectives and Key Performance Indicators
- Lubricant Standards, Consolidation and Procurement
- Documentation and Revision of Lubrication Procedures
- Lubricant Storage and Handling
- Lubrication and Re-Lubrication Practices
- Contamination Control and Management
- Oil Sampling Practices
- Oil Analysis Test Slate, Frequency and Use of Results
- Health, Safety and Environment Practices
- Lubrication Program Review and Improvement

2-Day Audit
